DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species:

Group A: Species I drawn to a cutter assembly with a cutting edge or Species II drawn to a cutter assembly with a cutting edge with a notch or Species III drawn to a cutter assembly with a cutting edge having crenations.

Group B: Species IV drawn to a cutter assembly with a cutter aperture or Species V drawn to a cutter assembly with a cutter aperture having a barbed section.

Group C: Species VI drawn to an introducer with a single side aperture or Species VII drawn to an introducer with a plurality of side apertures.

Group D: Species VIII drawn to hollow sheath inner diameter of introducer being 0.001 inches to 0.1 inches or Species IX drawn to hollow sheath inner diameter of introducer being 0.0002 inches to 0.001 inches.

Group E: Species X drawn to introducer side aperture with axial length of 1mm to 5mm or Species XI drawn to introducer side aperture with axial length of 2mm to 3mm.

Applicant should elect one species from Groups A through E.

Art Unit: 3736

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions

Art Unit: 3736

unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.
